# Home Theater, HDTV, Digital TV HD Cables & Adapters

## The next generation of HD cable is here!

### Check out these new features:

**Ethernet Channel** – Adds high-speed networking to an HD link, allowing users to take full advantage of their IP-enabled devices without a separate Ethernet cable.

**Audio Return Channel** – Allows an HD-connected TV with a built-in tuner to send audio data "upstream" to a surround audio system, eliminating the need for a separate audio cable.

**3D** – Defines input/output protocols for major 3D video formats, paving the way for true 3D gaming and 3D home theater applications.

**4K Support** – Enables video resolutions far beyond 1080p, supporting next-generation displays that will rival the Digital Cinema systems used in many commercial movie theatres.

**Content Type** – Real-time signaling of content types between display and source devices, enabling a TV to optimize picture settings based on content type.
