### 4 MP Chroma IP Fixed Bullet Camera

The Chroma surveillance camera series provides color night vision video, and will capture color images in low lighting or no lighting environments. standard infrared surveillance cameras are designed to shift to black & white video in low or no lighting, making it difficult to identify any details related to object color. With the SecurityTronix Chroma technology, you are now able to identify colors across image examples such as hair, clothing, license plate, and vehicle, whether day or night.
